Southwestern Section Meeting

Sparks, NV
EXPERT ASSISTANCE IN THE FIELD

UL REGULATORY SERVICES

Code Authorities have a trusted partner in UL Regulatory Services. Building on our 120 years of experience with safety, we’re able to provide expert support on demand, in person, on the phone or with our online services such as:

• UL Code Link – an installation code correlation database
• A comprehensive technical library
• Resources for field evaluations of unlabeled products

From field evaluations to clarifications of complex technical and compliance issues, it’s good to know you can rely on one trusted source for all your regulatory needs.

Welcome to the Ninety-First Annual Business Meeting of the IAEI Southwestern Section

The 2014 Southwestern Section Meeting in Reno, NV promises to be another spectacular event for all. It is a great mixture of education, fun and reuniting with old friends as well as meeting new ones. Nothing compares to this opportunity to come together for outstanding training. If you are reading this, consider yourself one of the lucky few who are going to experience what the IAEI Southwestern Section has to offer.

Our education committee, led by Lanny McMahill, has outdone themselves once again. Of the variety of subjects that will be covered, you are sure to find a new favorite. For returning attendees, you will find new seminars offered and possibly some old favorites that you can brush up on. Whether you are attending an educational program for the first time or refreshing your knowledge base, the educational program is sure to please.

As many of you may already know, Reno is hosting their annual rib cook-off. So, if you find yourself looking for flavors that will not disappoint, be sure to grab a few friends and go explore and share some amazing ribs. It is as if Reno knew we were coming and decided to welcome us with their rib cook-off!

As the partner program kicks off, the attendee’s friends and loved ones will enjoy a fun filled lineup. At a recent Section meeting, I overheard one of the partners telling her friend that her husband was wavering on if he would attend the meeting. She told her husband that she would be going with or with out, him giving him little say in the decision on whether to attend or not! As you can see, it is not just those who come to take advantage of the education IAEI has to offer that look forward to the annual meeting. The partners will be coming here to reunite with old friends...friends that they have built very strong bonds with. Several have been attending for 30+ years. That is simply amazing!!!

As the meeting winds down, I look forward to learning who the Artie’s Apple recipient will be this year. I am in awe to see all of the past year’s recipients all lined up on the stage honoring a man with seemingly unmatched dedication to the education for our Section. It is always fun trying to guess who the next award recipient will be as they anonymously introduce and segue into the announcement of the next well deserving applicant. Will you be able to guess whom the recipient is before they announce this year’s choice? Maybe you will have the honor to be announced as the next one to receive the Artie’s Apple award.

As your 2014 SWS president, I welcome you to the 91st IAEI Southwestern Section annual meeting. Let the learning, networking and fun begin!!!

Rhonda Parkhurst
2014 President
IAEI Southwestern Section
THE NINETY-FIRST
ANNUAL CONFERENCE ON
CODE DEVELOPMENT & EDUCATION
SOUTHWESTERN SECTION
INTERNATIONAL ASSOCIATION

NEC® Learning Resources
Apply the New Code with Confidence

Applying the NEC® has never been easier than with ATP’s series of Code-related learning resources. Each resource accurately addresses content with practical examples, large illustrations, and relevant practice tests to give you a better understanding of the NEC® and the effect it has on the electrical industry. Many new and updated editions are available to help keep you current and up-to-date.

Power-One is now officially known as ABB. But this is much more than just a name change. One of the most innovative inverter manufacturers in the world now has the engineering, infrastructure and financial clout of a Fortune 500 company. The benefits to our customers and the solar industry as a whole should be felt for years to come. ABB now has one of the industry’s most comprehensive offerings of solar inverters for residential, commercial and utility-scale pv installations. For more information please visit: www.abb.com/solarinverters
Siemens now offers an expanded portfolio of meter-load center combination products to meet the growing demands for alternative energy solutions. We now offer devices that can accept max PV input ampacity of 40A, 70A, and 100A for a variety of applications and budgets.

Siemens new Dual Function Circuit Breaker combines GFCI and AFCI, protecting against both arc faults and ground faults. This along with the new Self-Test and Lockout feature, makes it first in class in residential electrical safety.

As of July 1, 2014 the Solar Ready Requirement of the Title 24 building code mandates that all new single family residences in California be provisioned for future solar installations at the time of construction.

Two state-of the art technologies packaged in one small device.

The 2014 National Electric Code now requires both Arc Fault and Ground Fault protection on kitchen and laundry circuits. Siemens new Dual Function Circuit Breaker meets these new code requirements while eliminating the need for pairing an AFCI breaker with a GFCI ground receptacle. This solution offers significant cost and installation savings as well a more accurate and efficient maintenance.

Fast, Cost-effective, and Reliable Field Evaluations

If you need the right balance of speed and safety in your Field Evaluations, turn to TÜV SÜD America. We are one of the most recognized and highly respected third-party, OSHA-accredited safety organizations worldwide.

We can evaluate to most UL, NFPA, ASTM, ASME, and ANSI standards for equipment safety, including:

- NFPA 70
- UL 508A
- NFPA 70
- UL 61010-1A

Visit www.tuv-sud-america.com to see how we can enhance your Field Evaluations.

Standing the test of time!

STABILOY® Brand XHHW-2 with thermoset insulation can really take the heat! Not only does STABILOY Brand XHHW-2 test better than THHN’s thermoplastic insulation for durability in temperature extremes—it performs better by every measure. With STABILOY Brand XHHW-2’s thermoset insulation, there’s no safety risk when subjected to the extreme temperatures experienced in rooftop installations.

STABILOY® BRAND

The Advantages of STABILOY Brand XHHW-2:

- Higher emergency operating temperature and short circuit withstand rating
- Temperature adder not required when installed in raceways or rooftop installations
- Not subject to “plasticizer migration”
- Insulation does not “flow” under high heat or high pressure conditions
A Trusted Symbol of Safety Everywhere

Your mission is to keep people and property safe. It’s ours too. When you see Intertek’s ETL Listed Mark on electrical installations and products, you can be assured that they have been tested and certified to industry standards. Our legacy in product testing dates back more than 100 years, and our engineers have the industry, technology and product expertise to ensure the work is done correctly. As an OSHA-recognized NRTL, we test to the latest standards from ANSI/UL, CSA, NFPA and more, so you can trust that a product bearing an ETL Mark has been properly tested and certified to meet code requirements.

ETL: A symbol you can trust.

Visit www.intertek.com/ETL today or call 1-800-WORLDLAB to learn more about Intertek and ETL certification.
QPS Evaluation Services Inc.
Testing, Certification and Field Evaluations
Accredited in the USA, Canada and Internationally

As a Nationally Recognized Testing Laboratory (NRTL), and a long time recognized leader in Field Evaluations, customers and regulators can count on QPS to assist them with field labelling of unlisted products quickly, expertly and cost-effectively.

In addition to field evaluation, we also provide the following third-party Testing and Certification services to North American, European, International and Other Countries Safety Standards.

- Electrical/Electronic Products
- Equipment used in Hazardous Locations
- Wind Turbines
- Photovoltaics
- Machinery Safety
- Energy Efficiency
- IECEx Scheme
- IECEE/CB Scheme
- CE Marking Assistance
- ATEX Certificate

ARTIE’S APPLE AWARD

“FOR THOSE WHO EAT FROM THE TREE OF KNOWLEDGE AND SHARE WITH OTHERS.”

This is awarded each year, in memory of Art Buxbaum, past IAEI International Vice President for the Southwestern Section, to an individual for their DEDICATION AND EXEMPLARY EFFORTS TOWARDS EDUCATION IN THE SECTION.

The past recipients are:

2002 Lanny McMahill, City of Phoenix
2003 Chuck Leisher, Square D Company
2004 Timothy Owens, City of Santa Clara
2005 John Taecker, Underwriters Laboratories Inc.
2006 Michael Johnston, IAEI
2006 Tom Trainor (Honorary), City of San Diego, Retired
2007 Rick Maddox, Clark County, Nevada
2008 Dick Loyd, Steel Tube Institute
2009 Marv Millet, Oakland, CA
2010 Joe Jones, Apple Valley, CA
2010 Bob Milatovich (Honorary), Clark County, NV
2010 Bill Clark (Honorary), City of Sacramento, CA
2012 Jim Maldonado, City of Tempe, AZ
2012 Joe Andre (Honorary), NEMA, Retired
2013 Mark Ode, UL University
2013 Mark Earley (Honorary), NFPA
2013 Chuck Mello (Honorary), UL
Put Time on Your Side with eti Conformity Services

» Code Compliance
» Field Evaluation
» Acceptance Testing
» Commissioning
» Engineering Studies

When you are trying to bring a project to completion and the local inspector unexpectedly “red tags” your equipment, time isn’t always on your side. It takes time to perform the necessary testing, particularly where conformity assessment is concerned.

Experience the eti Conformity Services difference. Reduce the time it takes to get your unlabeled equipment operational by choosing eti Conformity Services, an accredited Field Evaluation Body (FEB) that has already performed extensive testing within your industry. Our conformity services team provides fast, reliable service when and where you need us. Our technical experts provide solutions through accurate testing, informed consulting and comprehensive reporting. And we won’t keep you waiting.

Call us today at 877-458-6384 and put time on your side.
Radix DuraLife® FPL

The first silicone insulated fire alarm cable to pass the new UL2196 recertification for low-voltage, power-limited applications.

Radix DuraLife® FPL ensures fire alarm systems function in extreme environments, as well as being more flexible and easier to install than Mineral insulated (MI) cable.

TÜV Rheinland
Precisely Right.
WE’VE BEEN THE INDUSTRY LEADER FOR YEARS. BUT REALLY, WHO’S COUNTING?

After all, it’s only a number (87). And even more important than our (87) years of experience is the high quality of our armored cables and our unmatched industry knowledge. Not to mention, the 390 AFC specialists providing exceptional customer support, and the valuable innovations we’re constantly introducing. But our (87) years as the expert is just icing on the cake. If you want a reliable, high-quality cable system and liquidtight conduit, call 1-800-998-1131 or visit http://afcweb.com/about.html. Because in the end, it’s always smart to go with the (87-year-old) pro.
ISA partners with the IAEI and works extensively with UL to promote electrical safety and code compliance.

ISA members are dedicated to code and standards education and participation in the process for code and standards development in partnership with the IAEI.

ISA welcomes the opportunity to answer questions about the electrical issues involved with signs, so please visit our booth!

For more information or further questions, please visit www.signs.org/electrical or call (703) 836-4012.
Product approvals become easier when you see CSA marks. They are among the leading marks in North America, appearing on billions of products confidently specified, purchased, installed - and approved by AHJs - across the U.S. and Canada every year. You can trust products that display CSA marks because we are an OSHA Nationally Recognized Testing Laboratory (NRTL), accredited by the Standards Council of Canada (SCC), and fully qualified to confirm products meet U.S. and Canadian national standards for safety or performance. CSA Group tests and certifies many of North America’s leading brands to standards written by ANSI, UL, CSA, NSF, ASME, ASTM, ASFE and more. We also verify energy efficiency to ENERGY STAR®, NRCan and CEC requirements. Look for CSA marks. They expand your possibilities and increase your peace of mind.

For up-to-date products listings and other information, please visit us online.
